SWING GATE OPERATOR

SOLAR POWER

1000_{LBS} CAPACITY

RESIDENTIAL
CLASS I VEHICULAR GATE OPERATOR

A true milestone among all gate operators. This is the only solar powered operator with technology capable of providing up to 200 cycles per day with a 10 Watt solar panel. The first solar gate operator with performance certification by UL (Underwriters Laboratories) verifying its remarkable number of cycles. It is an industry first, the Viking G-5s marks a new page in history of solar gate operation.

SOLAR POWER MANAGEMENT SYSTEM

- Viking Solar Power Management System maximizes the number of cycles per day.
- Power Saving Technology minimizes current draw.
- Sleep Mode for non-essential accessories minimizes current draw on stand-by.
- Most advanced Charger Systems in the industry.

LIGHTNING PROTECTION

- Advance lightning strike protection up 20,000 volts/ 10,000 amps.

PROTECTION

- Aluminum alloy and powder coating provides superior protection against corrosion.

SOLAR PANEL

- Single 12V Solar Panel System.

BATTERY

- Single 12V Battery System.

DIAGNOSTICS DISPLAY

- Real-Time Status Display of solar panel, charging and battery voltages.
- Monitoring and Diagnostic Display ensures easy troubleshooting.

Operational Voltage	... 12 VDC
Max Gate Capacity	... 1000lbs / 16ft
Cycles Per Day	... up to 200 cycles per day (10 Watt Panel)
Operating Speed	... 14-16 seconds per 90°
Operating Temperature	... - 20° F to +160° F

WARRANTY:
4 YEAR RESIDENTIAL
